One of the entries is the AOR.net Infobasic, the first real BBS system. 'It provided a text interface to access files on the 'hard drive' and a modem. The archive included more than 9,000 computer games and ran on the DEC Rainbow 128, DEC Sun-3 and Sun-4 computers. The Infobasic text format proved popular, especially with the many MUD (MUD stands for multi-user dungeon) players.
