Keymacro is a recording macro application for Windows. It allows you to easily record any keyboard combination and then automatically repeat it. The program also lets you create visual macros, meaning that the application can record the actions of your mouse as well. **KEYMACRO Pros:** It's easy to use; Simply choose the actions you want to record, and everything will be set up automatically. This is great if you want to record a combination of keyboard keys or combinations of menu choices for convenience. The software is very easy to use: The user interface is fairly straightforward and has only basic options and controls. It has customizable configuration settings: You can customize the keyboard shortcuts, text, sound, and more. **KEYMACRO Cons:** Unfortunately, the number of actions that can be recorded is rather small, and it doesn't offer recording a custom action, like most other macros. Navigate your favorite free torrent site and download torrents in just one click! SiaTorrent is the best BitTorrent client that gives you the ability to download torrent files of more than 40 million different files. **Features:** A fast and simple torrent client. Download torrents with only a few clicks! An easy to use and user friendly interface. Search for popular torrents in just a few clicks. Download torrents with a single click and easily manage your torrents. Download torrents on multiple trackers simultaneously. SiaTorrent is an application that is designed to make managing torrents easier for all of us. The app is designed to give you the most out of your torrents, and in particular to let you: Share all of your torrents over a local network with your friends Download torrents on all of your devices Rate torrents for different categories Download Torrents The application comes with preconfigured online torrent trackers, meaning that you will not have to configure them manually. You can search popular torrents on any of the online trackers, or you can use one of the trackers for a specific category. There are three types of torrents: tracker, magnet and link. A tracker is a server where a bunch of peers offer to exchange files. When you search a torrent, the servers that trackers are responsible for are searched. To prevent abuse, trackers monitor the peer activity, that is the peers that send and receive data. When a peer is inactive for more than
