In Device Manager, right-click on Search... Read Full Version I present to you an improved version of the program for working with CD/DVD/Blu-Ray discs. Of the additional modules, the ability to work with NTFS, FAT32, FAR and GPT file systems has been added. Now you can create, copy and delete files, flexibly configure work settings, work with hidden and system partitions, create DVD-ROMs with your own protection technology. In this way, you can protect your optical disk and store your data in it. Some major DVD manufacturers do not list the magnetic stripe on them. In this case, a "pseudo-lock" is formed on the edges of the disk, which is a violation of the production technology. Therefore, they are often not accepted in stores. But in a regular store they will replace it for you. To protect your disk from forgery and other troubles, you need to know what information it contains and be able to work with this information. As you know, almost all companies that produce discs put their trademarks on CD labels, so sellers could have unknowingly found fakes. Now the marking has become more visible on our website. Especially for you, we have made a convenient search that allows you to find the disk you need. Now you do not need to go to different stores and look at what is offered to you on the shelves. Find the disk you need and just click on it with the mouse. Free Download R-K Magician XP
